

Product Requirement Document (PRD)

Product Name: SubSentry

Tagline: *Clarity and control for your subscriptions — before they control you.*

1 Executive Summary

Verdict:  *Yes — the idea is worth pursuing.*
Confidence Level: Medium–High

Top Reasons

- India’s subscription economy (OTT, SaaS, fitness, education) is expanding rapidly.
- Urban professionals (22–40) are increasingly managing 8–12 recurring payments per month.
- No existing India-centric, privacy-safe solution focuses solely on *subscription visibility and renewal alerts*.
- Market is large enough for niche players to thrive with localized focus (INR, UPI, Indian merchants).

Vision:
To help digital consumers in India regain financial control and peace of mind through simple, proactive subscription management.

Mission:
Track all recurring subscriptions, prevent surprise renewals, and deliver calm clarity through one unified dashboard.

2 Market Opportunity

Metric	Estimate	Notes

TAM	₹60B / year (~US \$720M)	30M urban professionals × ₹2,000/month
SAM	₹30B / year (~US \$360M)	~50% actively seek spend-tracking tools
SOM (2–3 yrs)	₹1.5B / year (~US \$18M)	Capturing 5% of SAM in major metros

Growth Indicators:

- Subscription economy in India projected from ₹1,200 crore (2018) → ₹36,000 crore (~\$4.5B) by 2025.
- Global billing & subscription software CAGR ~11.3%; India-specific CAGR ~20.9%.
- Rising digital payment adoption (UPI, auto-debit) and awareness of recurring costs.

Risks:

Low switching cost, user price sensitivity, privacy skepticism.

Mitigation:

Manual-first model, freemium pricing, strong onboarding education.

3 Competitor Landscape

Competitor	Focus	Strength	Weakness
Bobby	Subscription tracker (global)	Simple UI	No India localization
Subsfy	Global subscription tracker	Insights dashboard	Limited INR / UPI focus

Rocket Money	US expense + subscription manager	Automation	Not India-ready
MoneyView / Walnut	India expense tracker	Local payment context	Not subscription-centric
Manual tracking (Sheets)	DIY	Free	No insights or automation

Whitespace Opportunity

Localized + privacy-first subscription manager for Indian professionals, combining:

- INR-native UX
 - UPI/card manual entry
 - Renewal alerts and spend insights
 - Optional AI-based cancel nudges
-

Target Customer Insights

Best-Fit User Segment

Aarav Mehta (28, Digital Marketing Executive, Bengaluru)

“Every month, some random renewal hits my card — I just want one place that tells me what’s coming up before it charges me.”

Snapshot:

Lives alone, handles 10–15 subscriptions, tech-savvy, uses UPI, seeks minimalism and control.

Core Motivation: Financial predictability and peace of mind.

Frustration: Manual tracking fatigue, unexpected charges, distrust in apps demanding bank access.

Pain Points & Gains

Rank	Pain Point	Current Workaround	Desired Gain	Severity
1	Forget renewal dates	Calendar/manual notes	Auto alerts before renewal	H
2	No visibility of total monthly spend	Manual estimation	Single dashboard summary	H
3	Duplicate/unused subs	Occasional manual check	“Cancel suggestion” insight	H
4	Generic expense apps	Expense managers	India-tailored UX	M
5	Privacy concerns	Privacy concerns	Manual-first safety	M

Emotional Core

- Users don’t just want tracking — they want **control**.
 - They don’t just fear renewals — they want **predictability**.
 - They don’t just dislike overspending — they want **confidence** in choices.
-

5 Core Problem Statement

Urban professionals lack visibility and reminders for recurring subscriptions, leading to surprise renewals, overspending, and financial anxiety.

Why Now:

Recurring spending is habitual; the pain repeats monthly. A single proactive reminder delivers instant perceived value.

"How Might We" Statements:

1. How might we alert users before auto-renewals?
 2. How might we visualize subscriptions clearly in one dashboard?
 3. How might we earn trust with a privacy-first model?
 4. How might we nudge cancellations for unused subscriptions?
-

6 Product Goals & Success Metrics

Metric	Target	Purpose
Activation (≥1 subscription added)	>40%	Measure onboarding success
Reminder engagement	>50%	Validate core utility
Monthly retention	>30%	Indicate habit formation
Subscription spend visibility	>60%	Demonstrate clarity
Premium conversion	>10%	Prove monetization potential

7 Functional Requirements (MVP)

ID	Feature	Description	Priority
F1	Login/Signup	Google Auth via Supabase	H
F2	Add Subscription	Name, cost, frequency, next date	H
F3	Dashboard	View total spend, renewals	H
F4	Renewal Reminder	Alerts 3–7 days before renewal	H
F5	Insights	Monthly and category-wise visualization	M
F6	Settings	Manage reminders, privacy mode	M
F7	Feedback	Collect user suggestions	L

Stretch Goals:

Smart auto-detection (SMS/email) · Shared subscriptions · AI summary (“Top 3 recurring costs”).

8 Architecture Overview

Front-End (via Lovable)

- Responsive web app (dashboard, reminder, insights).
- Components: Login → Dashboard → Add/Edit → Reminder → Confirmation → Settings.
- UI Style: Modern-minimal, calm colors (#2EB5A3 teal, #4C89E3 blue, white background).
- Font: Inter / Poppins, rounded edges, card-based layout.

Back-End (via Supabase)

Table	Purpose	Key Columns
users	Gmail-auth users	id, name, email
subscriptions	Main data	user_id, name, amount, renewal_date, category, status
reminders	Renewal triggers	subscription_id, scheduled_date, status
settings	User preferences	user_id, reminder_frequency, privacy_mode

APIs:

/getSubscriptions, /addSubscription, /scheduleReminder, /updateSettings

RLS: Enabled per `user_id`.

Optional Integration: Gmail/Gemini API → AI-generated renewal reminders.

9 Non-Functional Requirements

Category	Requirement
Usability	Complete key tasks in ≤3 clicks
Performance	Dashboard loads <2s for ≤100 subscriptions
Security	Google Auth, encrypted Supabase data
Privacy	Manual entry-first, no bank scraping
Scalability	1,000 MVP users
Accessibility	WCAG-compliant, 14px+ font
Localization	INR default currency, English UI

10 Brand & Design Identity

Brand Attributes: Empowering • Calm • Transparent • Reliable • Modern-Minimal

Tone: Warm, supportive, human — “Talk like a calm financial friend.”

Colors: White & gray neutrals, teal primary (#2EB5A3), blue secondary (#4C89E3)

Design Principles:

- *Clarity First:* one main action per screen

- *Trust by Design*: privacy-first communication
 - *Visual Calm*: soft colors, whitespace
 - *Speed of Action*: 3-click completion
 - *Guided Empowerment*: microcopy that mentors, not commands
-

11 Go-to-Market Plan

Next 30 Days:

- Conduct 10 interviews + 100 survey responses (urban professionals).

Next 60 Days:

- Prototype test with 20 users; iterate on dashboard + reminders.

Next 90 Days:

- Launch MVP; track activation (>30%), retention (>30%), and paid conversion (>10%).

Pricing Hypothesis:

₹49–₹149/month premium, free basic tier.

12 PRD Summary (for Documentation)

SubSentry is a calm, privacy-first web app designed for India's subscription-heavy professionals. It consolidates all recurring payments into one intuitive dashboard with proactive renewal reminders and monthly insights. Built using Supabase (backend + Gmail auth) and Lovable (front-end), it prioritizes simplicity, security, and local relevance. The MVP aims to validate user activation, alert engagement, and retention through minimal, humanized design.

Key Takeaway:

SubSentry transforms financial anxiety into calm control — reminding users that they, not their subscriptions, decide how their money flows.
